On the water reservoir permit- I recall it's mostly USACE....BUT EPA did hold up it's environmental review for its permit/ kept moving the goalpost on it for 5-10 years at least...maybe more. This was rectified once Trump took over and our environmental approval of the project was out the door in January 2018, and USACE issued permit in early Feb of 2018. Way to go R6.

That works great. And this allows us to meet with a variety of both local leaders, state officials, and in particular for these issues the oil and gas industry?

That's a fantastic issue to be able to help with the permitting and to be able to highlight that. Hopefully it's not all Corps of engineers.

Of course, I trust Texas doesn't think it's filling those reservoirs with Oklahoma water.... wait that was my old job, ok it's out of my system now.

RJ- We can do an hr meeting with the air announcements, and then a 30 min meeting on the water issue if that works for you RJ? You might recall Pruitt twice met with the North Texas Municipal Water District on this water project----- once on a trip he went on in Dallas, Texas and again here in at their flyin in the CVC on the Hill. Blurb from press we did on it below.

In August, I met with officials with the North Texas Municipal Water District. At the time, they had been stuck in the various state and federal approval processes for a new \$1.2 billion reservoir since 2003! That is unacceptable and we are committed to improving and expediting these processes. On Jan. 26, EPA concluded its permit review and the U.S. Army Corps of Engineers issued the final permit on Feb. 2. The reservoir, which is anticipated to be operational in 2022, will yield an estimated 70 million gallons of water a day and provide a massive economic boost to the region due to new housing, hotels, restaurants and stores. It will be the first new reservoir constructed in Texas in nearly 30 years.
